Pilot of PYPLOK Fitting System, NSCO-S-07

Dear Mr. Meshal,

This is with reference to the above contract for execution of pilot trial of PYPLOK Fitting System.

This pilot was undertaken to investigate the Pyplok Fitting systems as the weldless, threadless way to join pipes and tubes. The systems were reliable, leak-free, quick to install and eliminated the costly time and expense of chemical cleaning. The fittings were installed in 2 No of 1.5 inch carbon steel seawater lines located in the hose warehouse in Mina Al-Ahmad refinery.

The Task Team Members of KOC reviewed the pilot trial reports and test results. They have concluded that pilot test have complied with contract scope and met the success criteria of the project. The field trial project is deemed completed on 5th April 2014.

We thank you for conducting the pilot trial project.

Yours Sincerely,

Ahmad Kh. Al-Jasmi Team Leader R&T Surface Research & Technology Group
